

Manage The Sac-Suburban Merger

The San-Juan Board is again pushing an outside merger with Sac-Suburban-Water District:

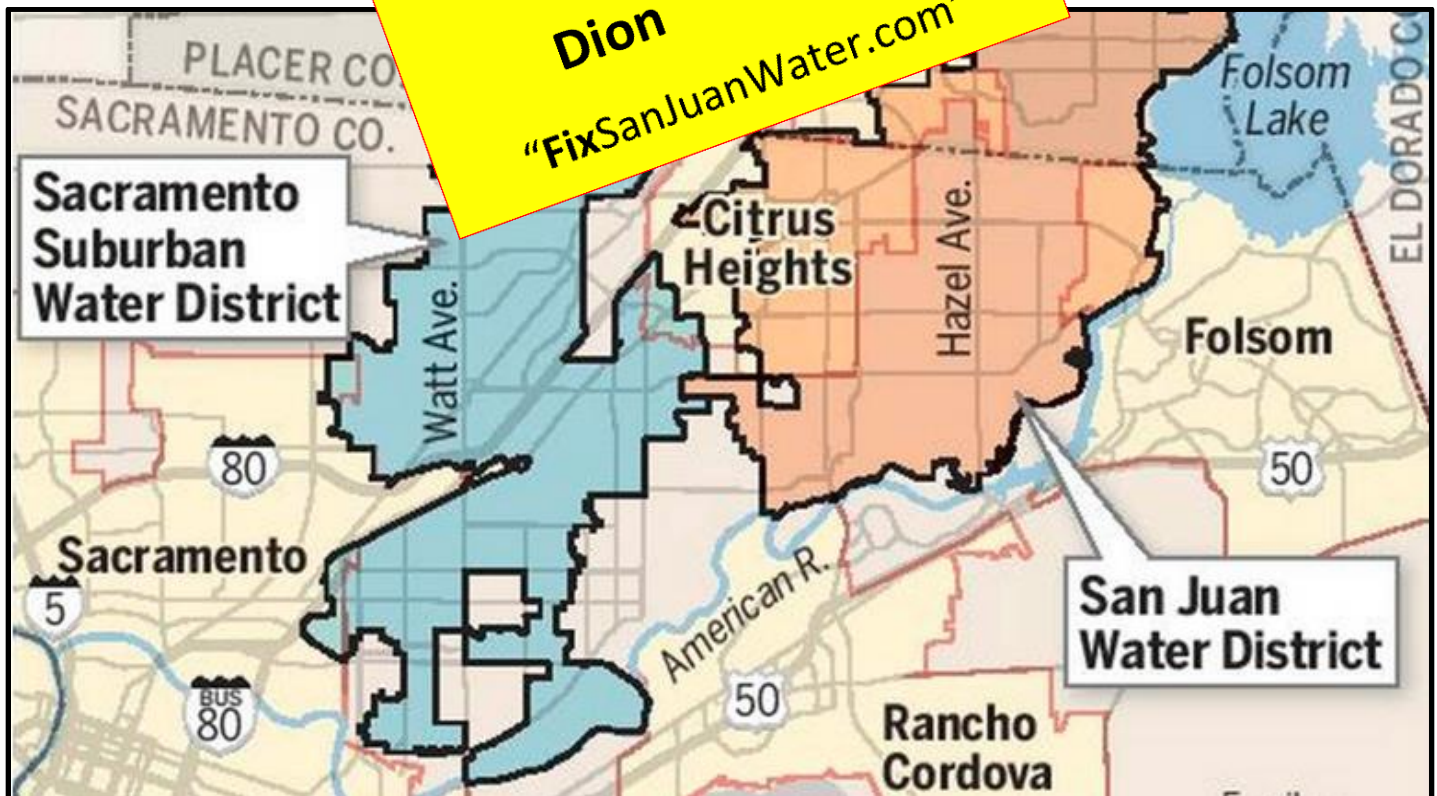

- Sac Suburban has approximately ~\$100 Million dollars of debt.
- Sac Suburban needs a more secure water supply (like San Juan water rights).
- Sac Suburban needs water treatment facilities (like San Juan water facilities).
- Sac Suburban's population is greater than half of San Juan's total population. If merged, Sac Suburban will become the voting majority!

What We Risk:

- There is a risk of losing voting control of our water district.
- There is a risk of spreading our water rights way too thin.
- There is a risk of complicated water agreements that make us pay off Sac Suburban debt.
- And a risk of lesser quality water being "pumped-back" and substituted to San Juan residents.

2020 Elect:
**Mitch & Mike
Dion & McRae**
